No More Expired Certificates!

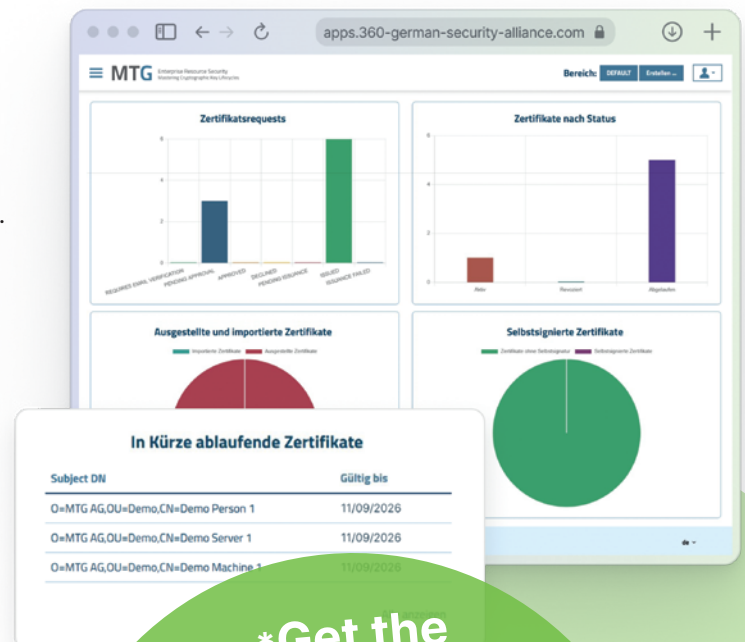

PKI made easy: Corporate PKI with Certificate Lifecycle Management – highly scalable and failure-resistant. Made & Managed in Germany.

Made & Managed
in Germany

360° Managed PKI & CLM – Why it's worth starting:

- ☒ **Free full version**
Create up to 50 active certificates with our PKI and manage them in the CLM.
- ☒ **Unlimited import of your own certificates**
Import your own certificates free of charge and without limits. Automatically via Certificate Discovery.
- ☒ **User-friendly dashboard**
Manage your CLM software simply and intuitively. Organized clearly by business units.
- ☒ **More automation, less errors**
Automate your processes with ACME, EST, SCEP, CMP or via REST API & CLI client.
- ☒ **Fixed-price PKI consulting**
Execute your PKI project on schedule for a fixed price. Use our PKI expertise.
- ☒ **PQC-ready**
Prepare yourself for the post-quantum era. Protect your data today – permanently.
- ☒ **Made & Managed in Germany**
Maintain sovereignty over your data in German data centers.

MTG

Implement and Automate more Use Cases comprehensively.

Our technology supports all common enterprise certificate use cases – regardless of system landscape or industry. Leverage established automation protocols, reduce manual effort, and eliminate typical sources of error. The result: efficient, scalable, and reliable certificate-based processes.

MTG

Autoenrollment Connector

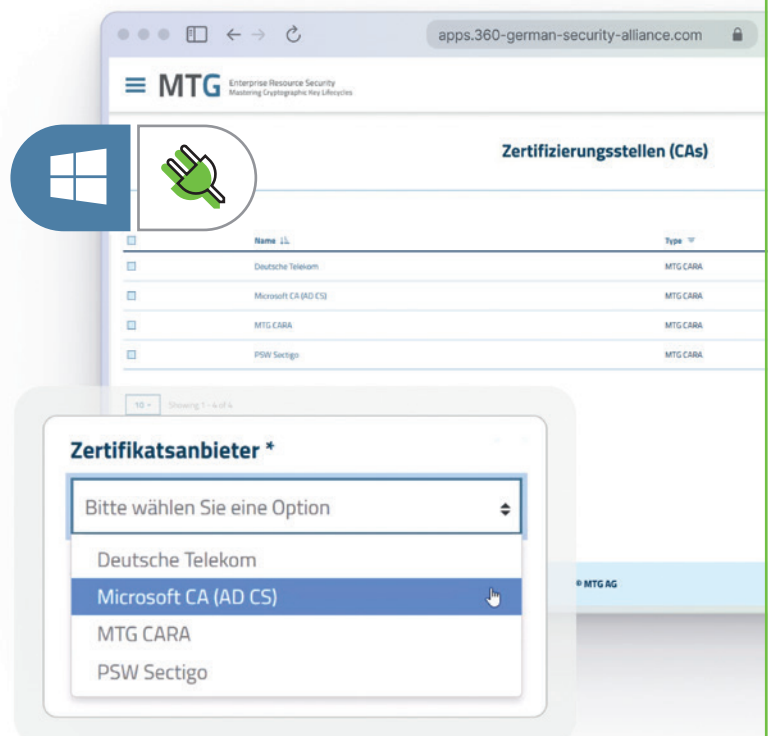

Microsoft PKI Migration and CLM Integration

Using Microsoft AD CS? The choice is yours: connect our Certificate Lifecycle Manager (CLM) to extend your existing infrastructure – or migrate gradually or directly to our Certificate Authority with our purpose-built Autoenrollment Connector, all without giving up your familiar Active Directory processes.

Automating the Windows environment

Do you not yet have a PKI? Then you can easily automate your certificate-based processes in the Windows environment by directly using our MTG PKI via the Autoenrollment Connector.

Autoenrollment Connector – execute PKI projects with precision.

DARZ

Certified Infrastructure. Full Data Sovereignty.

Your 360° Managed PKI & CLM is operated in certified, energy-efficient Green IT data centers of our partner DARZ in Germany. All data remains in-country; private keys are protected in high-security HSMs. A highly available, redundant fiber connection to central internet nodes in Frankfurt ensures global availability and optimal performance.

XELANED

Your fast track to a successful PKI project. PKI Consulting at a Fixed Price.

Our partner XELANED has been supporting international companies for over 25 years – with a clear focus on encryption and certificate solutions. Clients benefit from deep expertise gained through successful PKI projects in both mid-sized businesses and large enterprises. Especially popular: our Quickstart packages, enabling you to implement your PKI with precision, efficiency, and at a fixed price.

Get to know us in person!

The 360° German Security Alliance was created in response to a clear trend: more and more companies want to implement PKI – but often face technological complexity, questions about secure operation, and limited in-house expertise.

Three German security specialists – MTG, DARZ, and XELANED – have combined their strengths for you. Together we bundle essential success components: technology, operations, and expertise.
